

Wifi

- Wifi is used for computers, phones, or other devices to access the internet
- There's multiple different wifi providers such as T-mobile, Xfinity, and Verizon
- Wifi can differ on the price depending on providers, for example Xfinity is \$75 a month for wifi, while T-mobile is around \$50-60 a month
 - Wifi works by using radio waves to your router, then it sends information to your devices to give them access to the internet
